

Subject Index of Volume 4(C)

- Acoustic behavior, 299
 AFS, 39
 Al foam, 163
 Al-Based Alloys, 109
 Al-Cu-Mg alloy, 33
 Al-foams, 263
 Al-Ti alloy, 281
 Aluminium, 139
 Aluminium Foam, 69, 75
 Aluminium foam, 127, 275, 287, 323
 Aluminum, 85
 Aluminum alloy foam, 33
 Aluminum foams, 69, 75, 121, 127, 133, 227, 239, 275, 287, 323, 371
 Aluminum foam spheres, 317
 Aluminum Syntactic Foam, 257
 Aluminum-copper alloys, 85
 Analysis, 341
 Anisotropy, 157, 181
 APM technology, 317
 Applications, 127
 Areal density, 293
- Ballistic, 151
 Battery housing, 317
 Bending test, 323
 Binder, 81
 Biomaterials, 115
 Buckling, 329
 Building halls, 133
 Building industry, 133
- Carbonates, 275
 Casting, 85
 Casting process, 175
 Catalyst, 335
 Cell Surface Modification, 191
 Cellular materials, 15
 Cellular metal, 21
 CFD, 257
 Characterization, 127
 Characterization methods, 311
 Closed cell Al-foams, 9, 269
 CMSX-4, 45
 Coarsening, 45
 Combustion foaming, 281
 Compiste metal foam, 377
 Composite material, 27
 Composite metal foam, 151
 Composites, 75, 263, 311
 Compression behaviour, 63
 Compression test, 91, 227
 Compressive properties, 51, 157, 181
 Compressive test, 121, 175
 Contact technology, 359
 Continuous casting, 91
 Convection, 341, 389
 CT images, 227
 CT scanner, 299
 Cyclic testing, 269
- 3D Analysis, 145
 3D Fabrics, 15
- 2D Quantitative analysis, 251
- 3D Weaving, 15
- Dampening, 311
 Damping Estimation, 233
 Dealloying, 335
 Defined porosity castings, 57
 Deformation energy, 323
 Dendrites, 45
 Densification, 163
 Density variation, 157
 Digital image correlation, 269
 Directional pores, 91
 Dynamic loading, 377
- Effective thermal conductivity, 347
 Electric vehicle, 317
 Electronic cooling, 359
 Emission control, 305
 Energy absorption, 91, 151
 Energy storage system, 305
 Environmental catalyst, 305
 Enzyme, 335
 Expansion curves, 251
 Experiment, 341
 Experimental Modal Analysis, 233
- FE Modelling, 197
 FEA modeling, 215
 FEM, 227
 FEM Modeing, 233
 Finite Element, 221
 Flow boiling, 365
 Flow resistance, 187
 Flow resistivity, 299
 Flowability, 75
 Fluid temperature, 341
 Foam composites, 133
 Foam height, 359
 Foam Rheology, 75
 Foam sandwiches, 133
 foamability, 275
 Foaming, 251
 Foaming agent, 27, 97
 Foaming behavior, 281
 foaming process, 275
 Forming, 239
 Fouling, 299
 Fracture Surface, 45
 Friction, 239
 Functionally Graded Materials (FGM), 115
- Gamma ray, 293
 Gold, 335
 Green tape laser sintering, 103

- Hardness, 33, 139
- Heat exchanger, 353
- Heat regenerators, 371
- Heat transfer, 341, 353, 365, 371, 389
- Heat treatment, 33, 287
- High Temperature Colloids, 75
- High-pressure-die-casting, 57
- Hollow sphere structures, 347
- Hollow spheres, 63
- Hot dipping, 39
- Hot pressing, 39
- Hot-stage microscopy, 251
- HVC, 163
- Hybrid, 317

- Implants, 115
- In situ* observation, 281
- Infiltrated aluminium, 145
- Infiltration, 257
- Injection molding, 323
- Interface property, 311
- Interfacial bonding, 39
- Intermetallic foam, 281
- Interpenetrating phase composite, 215
- Investment casting, 139

- Laser based foaming, 97
- Light weight construction, 317
- liquid phase diffusion welding, 39
- Load Dispersing Plate, 181
- Local strain distribution, 269

- Mechanical Behavior, 45
- mechanical properties, 3
- Mechanical Properties, 109
- Melt route, 9, 33, 109, 275
- Metal foam, 281
- Metal Forming, 245
- Metal injection moulding, 63
- Metal matrix composite (MMC), 383
- Metal powder injection moulding (MIM), 383
- Metallic bubble wrap, 3
- Metallic Hollow Sphere(MHS), 181
- Metallography, 139
- Micro-CT, 69
- Microscale, 221
- Microstructure, 51, 139
- Micro-Structure Control, 245
- Micro-Tensile Modelling, 197
- Modeling, 221, 227, 257, 299, 371
- Monotonic testing, 269
- Morphological Characterization, 121

- Nanoindentation, 97
- Nanoporous metals, 335
- Natural convection, 359
- Nd:YAG laser, 103
- Neutron, 293

- Open cell structures, 305, 347
- Open-cell foam, 359
- Open-cell metal foam, 353
- Open-cell structure, 305
- Open-pore foam, 139
- Oxidation, 263

- Panel test technique, 347
- Particle stabilised, 263
- PCM (Periodic Cellular Metal), 203
- PCM (Periodic Cellular Metals), 169
- Permeability, 15, 81
- Phase change materials (PCMs), 389
- Phase Extraction, 45
- Plastic Deformation, 245
- Plasticizer, 81
- Plateau Stress, 121
- Pore size variation, 157
- Porosity, 163, 257
- Porous aluminum, 91
- Porous iron, 27
- Porous media, 257
- Porous titanium, 81
- Powder metallurgy, 51, 151, 157, 281, 287, 377, 383
- PPI-value, 359
- Precursor, 163
- Pressure drop, 365, 371
- Processing Additives, 109
- Production, 127
- Properties, 69, 127

- R134a, 365
- Radiation shielding, 293
- Reduction, 27
- Repeatability, 121
- Resource efficiency, 57
- Roll bonding, 3
- Rolling, 245
- R1234ze(E), 365

- Sacrifice material, 103
- Samarium strontium cobaltite, 103
- Samarium-doped ceria, 103
- Sandwich, 317
- Sandwich component, 239
- Sandwich core, 21, 169, 203, 209, 329
- Sandwich Panels, 197
- Sandwich structures, 269
- Self-assembled monolayer, 335
- Self-Assembly, 45
- Semi-finished parts, 133
- Semisolid expansion, 287
- Semi-solid slurry, 85
- Serial production, 57
- Silver foam, 51
- Simulation, 353
- Single film, 263
- Sintering, 81
- Slag foaming, 27
- Slip casting, 81
- Solid oxide fuel cell, 103
- Sound Absorbing Materials, 191
- Sound absorbing materials, 187
- Sound absorption, 9
- Sound Absorption Behavior, 187, 191
- Space holders, 115, 145
- Specific Strength, 245
- Split Hopkinson pressure bar, 377
- Stacking method, 181
- Stainless steel, 383
- Stiffness, 311
- Strain rate effects, 383
- Structural Characterization, 69

Superplasticity, 175
 Surface, 239
 Surface treatment, 323
 Synchrotron radiography, 281
 Syntactic foam, 383

Tensile property, 81
 Tensile test, 3, 175
 Tetraikadecahedral unit cell, 215
 Texture, 287
 Thermal conductivity, 389
 Thermal treatment, 9
 Thickener, 33
 Three-point bending test, 3
 Ti Foam, 97
 Ti implants, 97
 TiH₂, 33
 Titanium, 115
 Titanium Foam, 221
 Tomography, 145
 Tortuosity, 145, 299
 Transient plane source technique, 347
 TRIP steel, 63
 Truss structure, 169, 203, 209, 329

Tube hydroforming, 181
 Tubular Component, 181
 Two-Phase flow, 365

Unidirectional pore, 85

Vibration, 311
 Viscoplastic Damage, 197
 Volume averaging, 353
 Voronoi Simulation, 221

WBC(Wire-woven Bulk Cross), 169
 WBD(Wire-woven Bulk Diamond), 21
 WBK(Wire-woven Bulk Kagome), 203, 209
 Wire-woven metal, 169, 203, 209, 329

X-Ray Micro-Tomography, 197
 X-ray radiography, 281
 X-Ray Tomography, 69

Yield strength, 91

Zn-22Al alloy, 175
